College Bulletin

Mission

To develop highly qualified engineers that have
a rich sense of humanity and creativity.
To contribute to the wealth and advancement of
our local community
as a driving force of intellectual and
technological progress.

National Institute of Technology,
Kagawa College
[Kagawa KOSEN]

Message from the President

National Institute of Technology, Kagawa College (Kagawa KOSEN) was established in October 2009 through the merger of Takamatsu National College of Technology and Takuma Denpa National College of Technology. KOSEN consists of seven departments: Mechanical Engineering, Electrical and Computer Engineering, Electro-Mechanical Systems Engineering, Civil Engineering in Takamatsu campus, as well as Communication Network Engineering, Electronic Systems Engineering, and Information Engineering in Takuma campus. It has been consistently training engineers who support the industry boost of Japan's economic growth. KOSEN consists of a five-year integrated associate degree course after graduating from junior high school and a two-year advanced course, intending to develop practical, creative and internationally active professional engineers.

The five-year associate degree program combines general education and specialized engineering education promoting practical education that emphasizes experiments, practical training as well as classroom education. Our college maintains a high ratio of job openings that are not affected by economic trends, and students are also able to enter the college's advanced courses or transfer to various universities nationwide. This variety of options is one of the characteristics of our technical college. In the two-year advanced course after the associate degree program, students can further develop their research skills and international perspectives through advanced specialized education. Under this integrated seven-year education program, students can obtain a bachelor's degree which is the same as graduating from a university. After that, students can pursue graduate school.

We also emphasize global education by offering overseas internships and training programs in collaboration with international partner schools, as well as by welcoming students from abroad. These programs are designed to enhance cross-cultural understanding and communication skills, preparing participants to succeed on the international stage.

Today, society is undergoing a major transformation. IoT, where a lot of information and electronic devices are connected via the Internet, and AI with learning capabilities are rapidly changing the lives of people around the world. Without a doubt, it is engineers who are leading the way. At Kagawa KOSEN, after firmly establishing basic science subjects and specialized engineering education, we nurture the next generation of engineers who can identify issues on their own, conceptualize solutions, and create innovations through team discussions in problem-solving programs in collaboration with local companies and entrepreneurs.

The faculty and staff of Kagawa KOSEN will work together to improve the quality of education and research, reform education to respond to changes in society, and strengthen regional cooperation. We appreciate your understanding and support.

Nobuo Araki
President

Mission and Educational Goals

■ Mission of National Institute of Technology, Kagawa College : NITKC (Kagawa KOSEN)

- To develop highly qualified engineers that have a rich sense of humanity and creativity.
- To contribute to the wealth and advancement of our local community as a driving force of intellectual and technological progress.

■ Educational Goals

Kagawa KOSEN's educational objectives, based upon a detailed and comprehensive curriculum, are as follows:

- ◇ To broaden students' minds, with the aim that they will become engineers of the future that will play an instrumental role in a sustainable society.
- ◇ To train students to have the technological Knowledge and applicable skills for coping with these fast changing times.
- ◇ To train students to be engineers of the future, who can apply their imagination to tackle the complex problems of society.
- ◇ To develop the students' intellect, as well as communication skills, in order to prepare them for international career paths.

History

◇History

Takamatsu National College of Technology (Takamatsu KOSEN)※Takamatsu Campus of Kagawa KOSEN

April, 1962 Takamatsu National College of Technology(Takamatsu KOSEN) was established. It consisted of two departments: the Department of Mechanical Engineering and the Department of Electrical Engineering.

April, 1966 Takamatsu KOSEN was restructured into three departments: the Department of Mechanical Engineering, the Department of Electrical Engineering and the Department of Civil Engineering.

April, 1990 Takamatsu KOSEN was restructured into four departments: the Department of Mechanical Engineering, the Department of Electrical Engineering, the Department of Electro-Mechanical Systems Engineering and the Department of Civil Engineering.

April, 1999 Advanced Engineering Course was established.

April, 2001 Takamatsu KOSEN consisted of four departments: the Department of Mechanical Engineering, the Department of Electrical and Computer Engineering, the Department of Electro-Mechanical Systems Engineering and the Department of Civil Engineering.

April, 2004 Takamatsu KOSEN was reorganized and was affiliated with the Institute of National Colleges of Technology.

Takuma National College of Technology (Takuma Denpa KOSEN)※Takuma Campus of Kagawa KOSEN

October, 1943 Kanritsu Musen Densin Koshujo Osaka Branch (National School of Radio Telecommunications, Osaka Branch) was established at Yata-mura, Naka-Kawachi-gun, Osaka

April, 1945 Kanritsu Musen Densin Koshujo Osaka Branch was renamed Kanritsu Osaka Musen Densin Koshujo (Osaka National School of Radio Telecommunications).

April, 1949 Kanritsu Osaka Musen Densin Koshujo was relocated in Takuma-cho, Mitoyo-gun, Kagawa, and was renamed Takuma Denpa High School (Takuma Radio Technical High School).

April, 1971 Takuma Denpa High School became Takuma National College of Technology (Takuma Denpa KOSEN). It consisted of one department of Radio Engineering.

April, 1976 Takuma Denpa KOSEN was restructured into two departments: the Department of Radio Engineering and the Department of Electronics.

April, 1980 Takuma Denpa KOSEN was restructured into three departments: the Department of Engineering, the Department of Electronics and the Department of Information Engineering.

April, 1985 Takuma Denpa KOSEN was restructured into four departments: the Department of Radio Engineering, the Department of Electronics, the Department of Information Engineering and the Department of Control Engineering.

April, 1989 The Department of Radio Engineering was renamed the Department of Telecommunication Technology.

April, 2004 Takuma Denpa KOSEN was reorganized and was affiliated with the Institute of National Colleges of Technology. Advanced Engineering Course was established.

In October, 2009, Takamatsu KOSEN and Takuma KOSEN were incorporated and reorganized as National Institute of Technology, Kagawa College (Kagawa KOSEN). Two divisions including seven departments were set up: Industrial and Systems Division (Takamatsu Campus) and Electronics, Information and Communications Division (Takuma Campus).

The departments are as follows: Dpt of Mechanical Engineering, Dpt of Electrical and Computer Engineering, Dpt of Electro-Mechanical Systems Engineering and Dpt of Civil Engineering (Takamatsu Campus); Dpt of Communication Network Engineering, Dpt of Electronic Systems Engineering and Dpt of Information Engineering (Takuma Campus). The Faculty of Advanced Engineering was also set up: Advanced Course in Industrial and Systems Engineering; Advanced Course in Electronics, Information and Communication Engineering.
Dr. Masashi Kamon was appointed as the first president of Kagawa KOSEN.

In January, 2013, a commemoration ceremony was held to celebrate the 50th anniversary of the Takamatsu Campus and the 70th anniversary of the Takuma Campus.

In April, 2014, Dr. Takeshi Yao was appointed as the second president of Kagawa KOSEN.

In April, 2018, Dr. Yoshio Aso was appointed as the third president of Kagawa KOSEN.

In April, 2021, Dr. Masao Tanaka was appointed as the fourth president of Kagawa KOSEN.

In April, 2024, Dr. Nobuo Araki was appointed as the fifth president of Kagawa KOSEN.

Organization

◇ Chart of Organization

School System of Japan

- ① Junior high school graduates are eligible to enroll at a KOSEN.
- ② High school graduates are eligible to enroll at a KOSEN as transfer students.
- ③ KOSEN graduates are eligible to enroll in a university as transfer students.
- ④ KOSEN graduates are eligible to enroll in an advanced course.
- ⑤ KOSEN Advanced Course graduates are eligible to enroll in a university graduate program.

■ KOSEN System

KOSEN system — five-year engineering education from 15-year old — was established in 1961, in response to a strong demand from industrial sector to foster engineers who sustain Japanese high economic growth at that time.

Characteristics of KOSEN Education

Upon Admission

- We admit junior high school graduates
- We enable students to engage in career and life planning at a young age

In School

Practical and Innovative Education

- We develop an curriculum in the liberal arts and professional studies
- We have highly qualified teaching staff (more than 80% of specialized subject teachers have doctoral degree)
- We provide experimental and practical training, internship and coop education
- We provide programs accredited by JABEE
- We offer international exchange opportunities

Personality Development

- We offer student dormitories and extracurricular activities
- We hold Robot, Programming, Design and Speech contests
- We organize annual all KOSEN Athletics Competition

Upon Graduation

- We help students to find various career paths
- We produce engineers with extensive practical creativity

Departments

General Education

This division offers various arts and science subjects including physical education aimed at cultivating students with wide-ranging knowledge and basic understanding required for the study of engineering. Our curriculum covers that of senior high schools putting stress on mathematics and science, and also offers some courses at the college level to the senior students.

Industrial and Systems Engineering Division (Takamatsu Campus)

Department of Mechanical Engineering

Mechanical engineers play a vital role in product design, development and manufacturing of industrial products in the modern industrial world as well as new challenges in developing countries.

Our educational program is designed to develop creative mechanical engineers who will excel in the industrial world and fulfill their personal desire to leave a legacy of successful accomplishments.

Department of Electrical and Computer Engineering

The department of electrical and computer engineering intends to educate the engineers who can contribute to the high technological society. For this purpose, the educational curriculum is designed to include the fundamental of mathematics and physics in the first stage, and applied technologies are programmed in the next stage. Furthermore, teamwork and cooperativeness, which are necessary in the social works, will be introduced in the various experiments and circuit design. Major parts of these subjects consist of the technologies of the embedded system.

Materials Lab.	Lock-in Amplifier, Ultra High Resistance Meter, Liquid Nitrogen Cryostat, Thickness Meter, Green Laser
Power Electronics Lab.	Ball screw mechanical system with AC servo motor, Induction motor control system
Electromagnetic Compatibility Lab.	Uniform Magnetic Field Exposure System, Magnetic Field Measurement Device, Work Station
Electronics Lab.	Oscilloscope, Function Generator, DC Power supply, Q Meter, Digital Frequency Counter, Pulse Circuit Trainer
Acoustical Information Lab.	Anechoic Chamber, Acoustic Measuring System, Ultrasound Detector
Computer and Communication Engineering Lab.	Logical Circuit Experiment Apparatus, Semiconductor Element Experiment Apparatus, Arithmetic Circuit Trainer, AD/DA Converter Trainer, Logic Analyzer

Department of Electro-Mechanical Systems Engineering

The department has a curriculum to educate students standing on mechatronics which is a combined engineering field that consists of mechanics, electronics, control engineering and computer science. The students are expected to have the role of not only simple manufacturing but also design & development, quality management, maintenance & inspection and so on in the production process.

◆ Main Experiment Facilities

Room	Main Equipment
Structural Engineering Lab.	Static and dynamic loading machine, Beam testing machines, Servo-type 1D&2D shaking tables, 2D soil tanks
Materials Engineering Lab.	Automatic compression testing machine (Cap. of 300kN), Universal testing machine (Cap. of 1000kN), Concrete mixer, Oil jacks and oil pumps, Concrete cylinder end grinder, Freezing and thawing machine, Testing apparatuses for various concrete, Concrete curing water bath
Hydraulic Engineering Lab.	Three dimensional channel, Movable channels, Wave making channels, Shape-created weir, Pipe line with a Venturi meter, Wave height indicators, Various recorders
Geotechnical Engineering Lab.	Automatic consolidation testing apparatus, Universal compression testing apparatus, Cyclic triaxial compression test apparatus, Large-scaled universal direct shear apparatus, Falling head permeability test apparatus, B-type viscometer, High speed camera, Various soil testing apparatus
Environmental Engineering Lab.	Total organic carbon analyzer, Ion chromatograph, Gas chromatograph, Autoclaves, Centrifuge, Ultra pure water system, Electronic scale, Constant temperature ovens
Equipment room	Global Navigation Satellite Systems, Geographic Information System, Remote Sensing, Total station, Automatic levels, Plane table, Pranimeters, Stereoscope

Electronics, Information and Communication Engineering Division (Takuma Campus)

Department of Communication Network Engineering

Both modern industry and society rely heavily on telecommunication systems, which are also known as a “neural network” of society. The constituents of the systems are electric wires, optical fibers and electromagnetic waves, as well as a great deal of computers. The aim of the Department of Communication Network Engineering is to foster competent engineers in this promising field of telecommunications. The curriculum is organized so that students can qualify for various national licenses such as an On-the-Ground I-Category Special Radio Operator, or a First-Class Technical Radio Operator for On-the-Ground Services.

◆ Fulltime Academic Staff

Title	Name	Research Field
Prof.	ISSHIKI, Hiromi	Biomedical Engineering
	ONO, Akira	Telecommunication Electronic Circuit

◆ Main Experiment Facilities

Room	Main Equipment
Electromagnetic Anechoic Chamber	EMI(Electromagnetic Interference)Receiver, CVCF(Constant-voltage Constant-Frequency)Power Supply, BLog Antenna, Artificial Mains Network, Absorbing Clamp, Turn Table, Vector Network Analyzer
Applied Electromagnetic Wave Lab.	Radar, Satellite Compass, AIS(Automatic Identification System)Receiver, Radio Direction Measurement Equipment, Radio Transmitter, Radio Receiver
Photonics Lab.	Sampling Oscilloscope, Spectrum Analyzer, EO Converter, OE Converter, OTDR(Optical Time Domain Reflectometer)
3rd Fundamental Communication Eng. Lab.	Pulse Pattern Generator, Error Rate Detector, Optical Spectrum Analyzer
Information Network Exercise Room	Training Equipments for LAN(Local Area Network)Integration(Routers, Switching Hubs, Wireless LAN Access Points, Personal Computers), Microcomputer Development and Training System

Department of Electronic Systems Engineering

In light of the advancements of mechatronics and Information technologies, there is a large demand for engineers in the development and integration of computer science, robotic systems and telecommunications.

The program in our department is designed to offer students many options from various fields such as hardware, software, electronics and communication technologies. We combine theory and practical application in the same course which provides practical laboratory experience. Our goal is to cultivate ingenuity and innovation in our students and provide them with all skills necessary for a successful career in the electronics industry.

◆ Main Experiment Facilities

Room	Main Equipment
Common Lab.	Liquid Crystal, Tunable Filters, Cooled CCD Camera, Multispectral Imaging System, Hyperspectral Camera
Measurement Engineering Lab.	Equipment of Supply Current Test to Detect Lead Opens of CMOS ICs, Oscilloscope, Current Probe
Computer Engineering Lab.	Oscilloscope, Radiation Detector, Analog Waveform Processing System
Circuit Design Lab.	Photoelectron Yield Spectroscopy, UV-VIS NIR Spectrophotometer, Organic Thin Film Deposition Apparatus, Spectroscopic Reflectometer, Laser Micro-machining Apparatus, Atomic Force Microscope
Optoelectronics Lab.	Fluorometer, Quantum efficiency measurement system, Diffraction-grating monochromator, He-Cd laser, Ar ion laser, Cryogenic refrigerator
Electronics Lab.	Infrared Thermal Camera, 3D Printer, 3D Scanner, Tabletop Microscope, Non-Mydriatic Auto Fundus Camera, Pulse Oximeter
Materials Engineering Lab.	Pulsed Laser Deposition System, Sputtering Apparatus, Hall Effect Measurement System, X-ray Diffraction Equipment
Plasma Sintering Lab.	Spark Plasma Sintering System

Department of Information Engineering

The department offers students an opportunity to acquire the theoretical fundamentals of computer science, and learn how to apply this practical knowledge to everyday problems. The department aims to educate the students to be able to perform tasks such as the following:

- Information system development
- Application development and integration, such as sound and image processing, computer networking.

Faculty of Advanced Engineering(Bachelor's Degree Program)

The Faculty of Advanced Engineering at Kagawa KOSEN aims to develop analytical, problem-solving skills as well as research ability of students so that they become practical and creative engineers who will play important roles in various industries, and contribute to the regional economy and society through collaborative projects.

To accomplish this goal, the Faculty of Advanced Engineering is comprised of the Courses in Industrial and Systems Engineering Program at the Takamatsu Campus, and the Course in Electronics, Information and Communication Engineering Program at the Takuma Campus.

■ Educational Objectives

The educational objectives of the Faculty of Advanced Engineering at Kagawa KOSEN are:

- ◇ Students will acquire highly specialized knowledge in their engineering fields and develop analytical skills by attending advanced lectures and proceeding their thesis research.
- ◇ Students will acquire broad knowledge and problem-solving skills from practical experience in other related fields to play leading roles in interdisciplinary areas.
- ◇ Students will learn ethical issues and responsibilities as engineers through collaborative researches with local educational organizations and companies.
- ◇ Students will develop global perspectives and communication skills in Japanese and English, by participating in workshops and scientific conferences inside and outside of the college.

Advanced Course(Takamatsu Campus)

Advanced Course(Takuma Campus)

Advanced Course in Industrial and Systems Engineering (Takamatsu Campus)

This course has four sub-courses to educate students to be practical engineers with problem-solving skills and the creativity to develop technologies.

Mechanical Engineering Course

This course is for future mechanical engineers with problem-solving skills and innovative thinking.

Electrical and Computer Engineering Course

This course is for future electrical engineers, electronic engineers, computer engineers and researchers.

Electro-Mechanical Systems Engineering Course

This course is for future mechatronics engineers with well-founded skills who contribute to human well-being and welfare.

Civil Engineering Course

This course is for future civil engineers with knowledge of design, planning, disaster prevention and environmental preservation techniques.

Curriculum

Classification	Subject	Credits
Liberal Arts	Compulsory	Management Theory
		TOEIC Preparation
	Elective	Jurisprudence
		Reading of Literary works
Engineering Basic	Compulsory	Engineer Ethics
		Topics in Mathematics I
		Modern Physics
		Intellectual Property Rights
	Elective	English for Technical Purpose
		Physical Chemistry
		Analytical Chemistry
		Applied Physics
		Overseas English Program
		Experiments and Practicals I
Core Eng. Subjects	Compulsory	Experiments and Practicals II
		Thesis Research I
		Thesis Research II
		Seminar I
	Elective	Seminar II
		Special Lectures
		Internship I
		Internship II
		Internship III
		Internship IV

Motion Capture Analysis

Internal Combustion Engine

Water Quality Analysis

Classification	Subject	Credits
Eng. Subjects of ME Course	Elective	Internal Combustion Engines
		Computational Mechanics
		Elasticity and Plasticity
		Advanced Strength and Fracture of Materials
		Matrix Vibration Analysis
		Reliability Engineering

MS Course...Electro-Mechanical Systems Engineering Course

CV Course...Civil Engineering Course

■ Advanced Course in Electronics, Information and Communication Engineering (Takuma Campus)

We provide a consistent curriculum from the associate degree course into the bachelor's degree course. The curriculum subjects consist of " liberal Arts ", " Engineering Basics " and " Field Specialized ".

Courses to enhance specialization in the fields of electronics, information, and communications are aligned to make it possible for studies to continue from the corresponding associate degree course. The course covers all fields of electrical and electronics engineering such as electrical and electronic information communication for the purpose of broadening students expertise.

Thesis research, special research, experiments and exercises are paramount for the program. In thesis research, the chance to research with supervisors collaborating with faculty at university is established. Joint research with local industry to contribute to regional industrial development are also prepared for students. In special research and experiments, students form groups to collaborate with students from the different fields and utilize the specialized knowledge and skills acquired by each individual to develop systems.

We cultivate practical and creative engineers who have a wide range of perspectives that can acquire complex knowledge and advanced skills in specialized fields with multidisciplinary capacity. Furthermore, our students also acquire advanced communication skills, self-sufficiency, high trouble shooting and problem solving capabilities throughout these studies.

◇ Curriculum

Classification	Subject	Credits
Liberal Arts	Compulsory	Communicative English I
		Communicative English II
	Elective	Advanced Japanese Literature

Human Resources Development Office

◇ Organization Chart of Human Resources Development Office

◇ Activities of Academic-industrial Alliance

■ Association of Industrial Promotion of Kagawa KOSEN

Established on 28 August, 2009.

Purpose:

We utilize our knowledge, materials and human resources. We aim to develop local industries and enhance the partnership with them, through the many operations such as exchanging technologies and information. We would like to contribute to the promotion of the education and research in Kagawa KOSEN.

Description of business:

Promotion of technology development by the industry-academia collaboration. Development of local industries. Technology lectures, classes, workshops, Publish the information report, Consulting on technologies, Exchange information, Support for education of company workers, Promotion support projects of cooperative research, Internship, Recruiting fairs, Collaborative education, Promotion of education and research of Kagawa KOSEN etc.

■ Shikoku KOSEN Center for Innovative Technologies

Purpose:

Anan, Kagawa, Niihama, Yuge and Kouchi KOSENs utilize the potentials of the colleges and aspects of the Shikoku-area, and promote industry-academia collaboration activities to contribute to the stimulation and promotion of the local area.

Business outline:

1. Department of the creation of innovation
Matching industrial needs with research seeds of KOSENs in Shikoku-area. Consulting the technologies. Activities of academic-industrial alliance such as joint research.
2. Department of the Intellectual Property
Management and education of Intellectual Property in coalition for KOSENs in Shikoku-area.
3. Department of coalition for KOSENs in Shikoku-area.
Other activities to achieve the purpose of the center.

AI Social Implementation Education and Research Division

◇ AI Social Implementation Education and Research Division Organization Chart

Since the conclusion of an agreement of cooperation between the Matsuo Laboratory at the University of Tokyo (Mitoyo, Kagawa) and the National Institute of Technology Kagawa College (NITKC) on August 30, 2018, NITKC has been actively promoting development and social implementation of AI through Deep Learning Methods.

On April 1, 2020, the National Institute of Technology, Kagawa college have established the "the NITKC AI Social Implementation Education Research Division" building upon the educational and research resources as well as achievements of the Matsuo Lab at the University of Tokyo and Kagawa Kosen.

The Division actively delivers educational programs in AI and its foundational data science. Through these initiatives, we aim to cultivate students and researchers who possess creative ideas and the initiative to implement them in society, while also promoting the social implementation of research outcomes through collaborative projects with local enterprises.

Conclusion of the Agreement of Cooperation between Mitoyo Matsuo Laboratory of the University of Tokyo and NITKC (August 2018, Mitoyo City Hall)

The NITKC AI Social Implementation Education and Research Division will promote education through the following activities:

- (1) Research Development for AI student researchers.
- (2) Community Education (social implementation) in cooperation with local areas.
- (3) Accessible Lectures (visiting and remote) related to human resource development in AI technology
- (4) Regional Cooperation with the Mitoyo AI Social Promotion Organization (MAiZM)*

The NITKC AI Social Implementation Education and Research Division will establish the "Takuma Campus Education and Research Center for AI Social Implementation" and the "Takamatsu Campus Education and Research Center for AI Social Implementation" to promote AI education and social implementation on each campus.

*The Mitoyo AI Social Promotion Organization (MAiZM) <https://www.maizm.or.jp/>

On April 1, 2019, MAiZM was established in cooperation with Prof. Yutaka Matsuo from the University of Tokyo and with NITKC. The organization will be actively promoting AI(DL) education for NIT students and AI(DL) applications.

◇ Members

AI Social Implementation Education and Research Division	Director-General	MURAKAMI, Yukikazu (Associate Professor, Department of Electrical and Computer Engineering)
	Vice Director-General	MISAKI, Yukinori (Professor, Department of Electronic Systems Engineering)
Takuma Campus Education and Research Center for AI Social Implementation	Center Director	MISAKI, Yukinori (Professor, Department of Electronic Systems Engineering)
	Center Vice Director	IWAMOTO, Naoya (Associate Professor, Department of Electronic Systems Engineering)
Takamatsu Campus Education and Research Center for AI Social Implementation	Center Director	MURAKAMI, Yukikazu (Associate Professor, Department of Electrical and Computer Engineering)
	Center Vice Director	KIMURA, Yuto (Senior Lecturer, Department of Mechanical Engineering)

Infrastructure Maintenance Educational Center

Infrastructure Maintenance Educational Center at Kagawa Kosen (iMec Kagawa) was established on April 1, 2020. It aims to carry out recurrent education and to foster expertise in the maintenance and management of civil infrastructure using the educational and research resources at Kagawa Kosen.

The deterioration of civil infrastructure such as roads and bridges has become a social issue, and it is necessary to develop engineers for maintenance. iMec Kagawa offers practical education, including e-learning and lecture-based courses on maintenance. It also provides skill training on damage inspections and non-destructive testing (NDT), as well as hands-on learning using materials from actual deteriorated bridges. These programs are offered to students, local government officials, and private-sector engineers. Those who complete the prescribed course will be qualified for certifications such as Bridge Inspection Engineer certification registered with the Ministry of Land, Infrastructure, Transport and Tourism (MLIT).

The development of KOSEN-type academic-industrial cooperation for human resource development in infrastructure maintenance has been adopted as part of a project supported by MEXT (Ministry of Education, Culture, Sports, Science and Technology) to build a sustainable industry-academia human resource development system, running from FY2019 to FY2023.

Kagawa Kosen builds the basis for recurrent education in the community in collaboration with Maizuru Kosen, Fukushima Kosen, Nagaoka Kosen, and Fukui Kosen. These efforts to foster professional engineers nationwide have been recognized, and on January 16, 2025, the "REIM Academic-Industrial Cooperation Consortium," which includes Kagawa Kosen along with four other technical colleges and industry-government-academia regional partnerships, was awarded the MLIT Prize at the 8th Infrastructure Maintenance Awards.

Overview of the Bridge Maintenance Training Field

Facilities

Structural members collected from actual deteriorated bridges have been placed in the Bridge Maintenance Training Field for educational purposes.

Explaining Bridge Component Teaching Models

Inspecting a Steel Bridge

Inspecting a Concrete Bridge

Practicing Non-Destructive Testing

On-Site Bridge Inspection Training

Research

◆ Grants-in-Aid for Scientific Research

Mathematical Deepening of Audio Source Separation Based on Independence and Amplitude/Phase Modeling and Development of Multimodal Hearing-Aid system
 Research to realize a practical satellite development curriculum using a general-purpose satellite model starting from high school students
 Investigation of optimum arrangement of small-vertical-axis-wind-turbine clusters with interaction between the pairs and trios of turbines
 Application to Smart Machining Systems using Compression of Skill Data for Inheritance of Excellent Technician's Skills
 Perception and recognition of tactile texture through integrated silicon sensory hairs accessible to micro and constricted areas
 Quantitative Evaluation of Radiation trapping by a New Method Using Forbidden Line/Resonance Line Intensity Ratio and X-ray Optical Elements
 Development of resource recycling artificial geomaterial and application to geohazards prevention measures
 Development of assessment methods of both children's independent mobility and safety
 Thermocell using redox-active ionic liquid based electrolyte
 Development of criteria and decision-making measures for the continuation of local railways
 A free boundary problem of the Navier-Stokes equations in unbounded domains
 Higher spin duality and superstring theory with Wilson lines
 Development of a Method to Ensure Segregation Resistance of Concrete Using Unutilized Aggregates with Various Particle Shapes and Sizes
 Demonstration of a Simple and Low-cost Recirculating Aquaculture Systems (RAS) for Developing Countries
 Evaluation of building damage at inland area caused by low water depth tsunami overtopping due to different seawall configurations
 Development of transparent puzzle teaching devices that make EEG external lectures adjustable for individuals
 Exploration of New Pharmaceutical Lead Compounds Based on Catalytic Palladium Enolate Umpolung
 Elucidation of deterioration mechanisms of repair materials and development of technologies to prevent re-deterioration
 Gauge/gravity correspondence and quantum gravity for expanding universe
 A study on anonymization of cue information and inner information in dialogue
 Blood Pressure Measurement Using a Wearable Sensor without skin-contact Based on Fingernail Anatomical Features
 13 another research study, Number of Research Studies 34, Total Funds 29,159,000Yen

◆ Commissioned Research

Acquisition of test data and technical evaluation for CubeSat for innovative satellite technology demonstration experiments
 Installation test of a portable fishway for the upstream migration of *Oncorhynchus keta* and *Oncorhynchus gorbuscha*
 1 another research study, Number of Research Studies 3, Total Funds 6,502,500Yen

◆ Cooperative Research with Private Sector

Development of High-Performance Lead-Acid Batteries
 Extraction Technology of Metal from Abandoned Coated Wires
 On Share Cyber Security Information
 Research on next-generation fundamental technologies for multichannel audio signal processing
 Development of active phased array antenna using printing technology on stratospheric balloon surface
 Study on durability life prediction method of cable conductor/shield wire for moving parts
 Improvement of production line process under "mechasolutions"
 Spatial-information-based mixture sound analysis and separation using multichannel microphones
 A Study on the Visualization of Behavior Analysis in Patrol Inspections at Thermal Power Plants
 Development of generative AI technology for application in design DX
 A Fundamental Study on the Relationship Between Children's Independent Mobility and Urban Structure
 Research on Image Processing Techniques for Elucidating Tacit Knowledge of Experienced Healthcare Professionals
 Sentiment Analysis using Finite State Transducer (A casestudy on Myanmar Language)
 Research on Advancing Infrastructure Maintenance through Digital Transformation
 A Fundamental Study on the Longitudinal Changes in Children's Independent Mobility
 Research on Water Retention Assessment of Irrigation Ponds in Rural Areas and Their Influence on Downstream Hydrological Systems
 Building the operating environment for the autonomous navigation program of the pest control robot
 10 another research studies, Number of Research Studies 27, Total Funds 11,814,860Yen

◆ Other Competitive Funds and Grants

Development of a Versatile Robot Teleoperation Method Utilizing Video Call Applications, and Exploration of Its Potential
 Establishing upstream migration environments for rare Cottus species using a portable fishway system
 Development of technology for early detection of standing difficulty in beef cattle
 Monitoring of school Evacuation Drills using dashcams and reviewing drill plans
 Wide-band Force Control of Robot Arm Considering Sampling Clock Synchronization of Servo Motor
 1 another research studies, Number of Research Studies 6, Total Funds 5,790,000Yen

Facilities

◆Networking and Computing Service Center

■Network Infrastructure

Each campus has a dedicated connection with 1 Gbps to the Science Information NETwork (SINET).

Network Between Two Campuses and SINET6

■Computing Service

○Takamatsu Campus

Computers with automatic recovery systems are installed in the facilities and are used for computer literacy education and academic research. 47 client computers for the first training room; 50 client computers for the second training room; 18 client computers for the third training room; and 54 client computers for the multimedia room.

Takamatsu Campus Second Training Room

○Takuma Campus

Automatically-recoverable computers are installed in Advanced Information Lab, and are used for education on computer literacy and academic research. All of the students can connect their BYOD PC to the campus network with wired or wireless LAN in Second Seminar Room, Cyber Lab, and Multimedia Learning Lab.

Takuma Campus Advanced Information Lab

◆Human Resources Development Office

This office consists of the Collaborative Education Center of Emerging Technology and the Research and Development Center for Regional Innovation. Each center has many laboratories and a lot of equipment. These are used for students' experiment programs, the experiments for graduation thesis of the associate degree, the cooperative research, and the commissioned research. The equipment is as follows: X-ray diffraction system for thin-film crystalline analysis; X-ray fluorescence spectrometer; Atomic absorption spectrophotometer; Tabletop microscope; Ellipsometer; Scanning probe microscope; Scanning electron microscope; Finite element analysis system; Thermography camera; RF magnetron sputtering system; Fume hood; Digital Microscope; Atomic force microscope; Surface profiler.

Metaverse Society	Dance Society

Dormitories

■Seiun-ryo (Takamatsu Campus)

Takamatsu Campus has accommodations for students called Seiun-ryo, which consists of four buildings: South Dormitory, North Dormitory, West Dormitory and International Dormitory. Male boarders stay at North and South Dormitory and female boarders use West Dormitory. Overseas students stay at International Dormitory with Japanese students.

- South Dormitory 4-story building 57 private rooms(9㎡), 2 private rooms(13.5㎡), 1 shared room with 2 beds etc(24㎡), 1 shared room with 2 beds etc(13.5㎡)
- North Dormitory 3-story building 29 private rooms(11㎡), 1 private rooms(15㎡), 24 shared room with 2 beds etc(15㎡)
- West Dormitory 3-story building 23 private rooms(10㎡), 8 shared room with 2 beds etc(15㎡)
- International Dormitory 3-story building 70 private rooms(7㎡)
- Common rooms a study room, a seminar room, lounges with a kitchenette, laundry room, bath room and a canteen, shower and kitchen for all individual Units(International Dormitory).

◇Number of Dormitory Students

West Dormitory & North Dormitory

South Dormitory

■Shippo Dormitory • Shiun International Dormitory (Takuma Campus)

Takuma Campus has two dormitory buildings: Shippo Dormitory and Shiun International Dormitory. Overseas students and female students reside in Shiun International Dormitory, while male students reside in Shippo Dormitory.

- Shippo Dormitory Building 2: 4-story building with 26 private rooms (13.5㎡) and 9 shared rooms (27㎡) with 2 beds each.
Building 3: 5-story building with 46 private rooms (9㎡) and 69 shared rooms (18㎡) with 2 beds each.
- Shiun International Dormitory Building 4: 5-story building with 91 private rooms (9㎡).
- Facilities include: Common rooms, computer rooms, a lounge, lounges with kitchenettes, a laundry room, bathrooms, and a canteen.

Accounting

◇ Revenue and Expenditure (2025)

● Revenue (a monetary unit: 1,000yen)

Grant for working Expenditure	103,313
Facilities Improvement Expenses	744,590
Self-Revenue	
Tuition and Entrance Examination Fee	373,927
Miscellaneous Revenue	8,280
Industry-University Cooperation Research Revenue and Donation	62,674
Other Subsidy	33,736
Total	1,326,520

● Expenditure (a monetary unit: 1,000yen)

Educational Research Expenses	445,238
General Administrative Expenses	48,030
Facilities Improvement Expenses	744,590
Industry-University Cooperation Research and Donation Project Expenses	43,767
Other Subsidy	33,736
Total	1,315,361

Access from International Airports to Kagawa KOSEN

1 Narita International Airport(Tokyo) ⇒ (Narita Express) ⇒ JR Tokyo Station ⇒ (Tokaido Shinkansen) ⇒ JR Okayama Station ⇒ (Marine Liner) ⇒ JR Takamatsu Station

2 Tokyo International Airport(Tokyo) ⇒ (All Nippon Airways , Japan Airlines) ⇒ Takamatsu Airport ⇒ (Limousine Bus) ⇒ JR Takamatsu Station

3 Kansai International Airport(Osaka) ⇒ (Limousine Bus) ⇒ JR Takamatsu Station

4 Kansai International Airport(Osaka) ⇒ (Haruka Express) ⇒ JR Shin-Osaka Station ⇒ (Sanyo Shinkansen) ⇒ JR Okayama Station ⇒ (Marine Liner) ⇒ JR Takamatsu Station

Direct access from Takamatsu Airport or JR Takamatsu Station to NITKC is only 20 minutes by car.
